

# CHERRY REPACK CASE STUDY

Client seeking to automate labor-intensive packing of imported cherries. 4HM's task was to double production while cutting labor in half.  *Mission Accomplished*

## AT A GLANCE

### Challenges

- 35 person repack team
- Less than 1 Load Per 10 hour per 10 hour day
- Rejections at Retail
- Limited Space
- 12- week deadling

### Benefits

- Fill Clams or Bags per Order
- Separate by Importer
- Half the Labor
- More than Double the Production
- No Rejections at Retail

### First-Ever Cherry Repack Line in North America

The system allows to run clamshells and bags at the same time or divert 100% to either pack. The ability to keep growers separate was vital for this project as well.

Defect Sorting Valued Partner. Multiscan Technologies is a visionary company, passionate about the development of visual technologies for the Agri-Food industry, with particular know-how in 360-degree product inspection.

The leader in fresh packing and cleaning equipment for cherries by far world-wide. The evolution has dominated the mainframe fresh packing market for the past five years and continues to grow into other markets under the radar.

Specializing in End-to-End Automation and Packaging for over 100 years combined. 4HM makes global packaging solutions local by scanning the globe for each our our clients' unique and specific needs.

*We gave 4HM a pretty tall order and they came through in the clutch for us.*

*The group knows our business in-and-out. Our expectations were exceeded on this job "*
